

Scandinavian CRO appointed Gasell 2012

This year we named Gasell 2012 - an award given annually to Sweden's fastest growing companies by Dagens Industri.

- I am very happy for this and I am flattered! I take this is a clear indication that we are doing something good and requested, says Ulrika Hammarström Lüllmaa, president and founder of the company.

In recent years SCRO have grown organically and expanded in a very successful way - turnover and staff numbers have tripled the last three years. The company are dedicated to growth and development, and have great ambitions in mind for the future.

- We expect continued growth next year and hope to recruit and invest in both new and existing businesses, says Ulrika Hammarström Lüllmaa and says that part of the investment in new business areas is the recent recruitment of a statistician, something that customers have asked for.

Fewer than 0.5% of the Swedish company qualifies annually to become a Gasell company. To become a Gasell the company must have an annual turnover exceeding 10 million SEK, have at least ten employees and have at least doubled its turnover, if the first and the last financial year is compared. In addition, they have increased their turnover every year for the past three years, have an overall positive profit for the four financial years, have grown organically in all material respects (not through mergers or acquisitions) and be financially healthy. SCRO fullfills all this. As far as possible they try to utilize the latest technology in the business, says Ulrika Hammarström Lüllmaa and mentions that they, together with companies such as Karolinska Development, has developed an app for mobile phones to manage clinical data electronically and thereby produced very good results:

- It is important to constantly review our activities and what is asked for. We constantly try to adopt to the latest technology and are dedicated to please our customers and grow our business - in Sweden and abroad - and then I am convinced that personal meetings with customers and the ability to think in new ways are key success factors.
